School Health Examination Requirements and Physical Limitations

New York State Education Department Law requires a current health examination/appraisal for all new students, students in 7th and 10th grades, interscholastic sports and working papers. The health examination/appraisal should be performed by a private care provider or the school medical director. Please submit your child's current health examination within 30 days of attendance. If your child has an appointment for a health examination, please state so below.

Unless the school is notified in writing with a statement from a private care provider of a student's physical limitations, the school will assume that each student is in good physical condition and will be expected to participate in all school activities.

Name of Student: _____

I wish to have the Health Examination/Appraisal performed by:

_____ Family Doctor

Date of Appointment: _____

_____ School District Physician

I have read and understand the above information concerning the Health Examination/Appraisal and my responsibility of informing the school about my child's physical limitations.

Signature of Parent: _____ Date: _____
